A diagram of a rectangular prism. Two diagonal arrows, labeled L1 and L2, intersect at the center. L1 points from the bottom-left corner to the top-right corner. L2 points from the bottom-right corner to the top-left corner. Two circular labels, 14 and 16, are positioned near the intersection. Label 14 is on the right side, and label 16 is on the left side. A label 6 in a box is on the right side, with an arrow pointing left towards the prism.

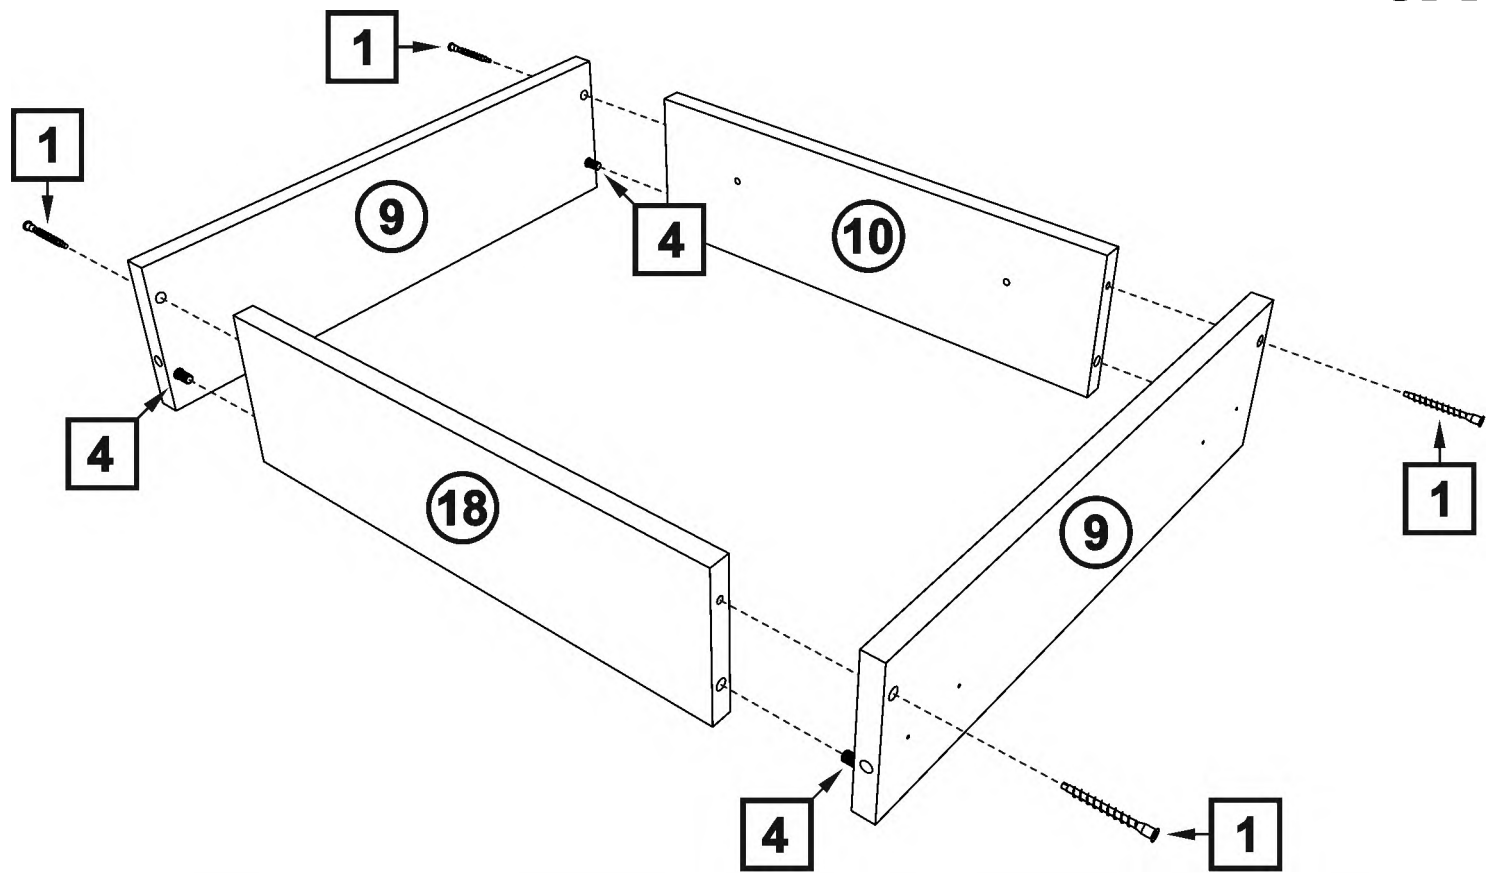

The diagram illustrates a two-layer system. The top layer consists of a horizontal line with five nodes labeled 2, 3, 9, 9, and 12. The bottom layer consists of a horizontal line with six nodes labeled 2, 9, 12, 3, 9, and 13. Vertical dashed lines connect corresponding nodes between the two layers. Arrows indicate the flow of information or data between the nodes. A central node labeled 12 is shown at the bottom, connected to the bottom layer by a vertical dashed line.
